Introduction from the President of the Executive Board

In 2022, 3 Bank continued its growth and successful operations, balancing social and financial goals despite the challenges caused by the geopolitical and macroeconomic factors. In addition to good business results, we are nonetheless proud of the fact that the clients placed their trust in us, recognizing us as a reliable partner in the realization of personal and business goals, even in times of great economic uncertainty. The loan portfolio grew by 22% and at the end of the year amounted to RSD 20.4 billion. The number of loan clients increased by 15%, so Bank finished the year with more than 75,000 loan clients.

The Bank retained first place on the market with the number of loans granted to agro households, along with strong growth in the entrepreneurial segment, while in the retail client segment the Bank recorded a slight increase in market share. At the end of 2022, the Bank's market share in the number of loans was 4.4%. Client deposits also recorded targeted growth and reached the level of RSD 15.1 billion at the end of the year.

As in previous years as well, the social performance of the Bank was in line with business performance. As many as 73% of clients were from rural areas, while the share of the so-called underbanked clients, or clients who have not had access to loans before, amounted to an excellent 41%. This indicates that we are sticking to our mission and strategy, which is to improve loan access for categories of clients for whom this access is difficult, in other words - financial inclusion.

In 2022, we continued with the digitization process and took the first step towards creating a digital offer for our clients. The first digital product that allows clients to realize a loan without ever coming to the Bank was implemented, thus raising the availability of financial services to an even higher level, especially for clients with the limited access to the said services. At the same time, we have laid an excellent foundation for the further development of digital products for different client segments.

After the successful change of the ownership structure and change of the Bank's name, the rebranding process was completed with all Bank's outlets proudly bearing the 3Bank logo, which symbolically depicts the three main goals of our activity: a positive impact on society, environment and the economic prosperity of the Bank and its employees.

The new shareholder structure, consisting of some of the most famous banks in the field of green lending in Europe, provided us with a new strategic direction which includes enriching the bank's offer with products that will have a positive impact on the environment and make a significant contribution to the "green transition" in the Republic of Serbia.

The said results were achieved thanks to the unreserved support of our shareholders, as well as the exceptional commitment and professionalism of our employees. On this occasion, on behalf of the Executive Board, I wish to thank them for their efforts, their willingness to further improve themselves and their commitment to developing a relationship of partnership and trust with our clients.

Vladimir Vukotić, the President of the Executive Board of 3 Bank

*

Corporate management

Until November 19, 2020, the sole shareholder of Opportunity Bank JSC Novi Sad was Opportunity Transformation Investments, Inc. (OTI) a holding company founded in June 2000 with the primary goal of holding ownership shares in Opportunity International partner banks. OTI founded Opportunity Štedionica in Novi Sad in 2002 in order to provide financial services to micro and small entrepreneurs and support employment in the Republic of Serbia, and in 2007 was successfully transformed into a bank in accordance with permission from the National Bank of Serbia. On November 19, 2020, a transaction was conducted in which OTI sold 77.99% of Opportunity Bank shares to a consortium of investors. All investors, and now new shareholders, same as 3 Bank (the name of Bank was changed on 22 Nov 2021), are members of GABV - Global Alliance of Value Banks.

SHAREHOLDER STRUCTURE ON DECEMBER 31, 2022

5. Chamber of Commerce of Vojvodina, Serbia

Description of business activities

3 Bank provides loans and other financial services to entrepreneurs, micro and small enterprises, rural households and agricultural holdings in the Republic of Serbia, as well as other clients who have difficulties accessing financial services. Our products are intended for starting or developing business or agricultural production, creating new and maintaining existing jobs, and ultimately providing better lives for our clients and their families, and we are especially dedicated to the development of local communities in smaller rural districts, away from cities, where financial services are not easily accessible but are extremely needed.

We want to become a leader in providing financial services to small enterprises, entrepreneurs and small farms in the Republic of Serbia, and we do this through support to private entrepreneurship and opening up new opportunities for the unemployed and economically vulnerable in Serbia.

Since its establishment and until the end of 2022, 3 Bank has disbursed 347,834 loans in Serbia in the amount of over EUR 960 million, opened up 64,657 new jobs, and helped maintain 321,499 existing jobs.

Management of human resources

The term human resources i.e. human potential refers to all employees of the Bank and implies their knowledge, skills, creative abilities, motivation and commitment that they invest in order to improve both business operations and personal competency, while adhering to the Mission and Values of the Bank.

A Shared Responsibility

Meaningful, professional, dignified and inspiring management of the Bank's employees is the task of managers at all levels, as well as the Human Resources Department.

Line managers have the primary responsibility to ensure psychologically safe work environment where employees will feel appreciated and where the support and setting will be provided for them to express their full potential and commitment to the success of the Bank.

The Mission of Human Resource Department is to provide partner support and development along with professional guidance to managers aiming to deliver business results by optimizing the performance of our people and ensuring good working conditions.

The Human Resource Department Vision is to for the Bank to differentiate itself with good HR practices as an employer of choice on the labor market.

Selection and Recruitment

Long term success of the Bank depends on its capacity to attract, retain and professionally develop employees and this is the primary responsibility of all managers.

The main criteria for hiring employees are their knowledge, skills, attitude and personal values, regardless of race, gender, nationality, social origin, birth, and religion, political or other beliefs, financial status, culture, language, age and mental or physical disability.

Learning and Development

Employees at all levels are encouraged to continuously upgrade their knowledge and skills. Commitment to employee development is one of the key traits of the Bank as an employer.

Company learning in the Bank implies a structured series of activities aimed at building the necessary and anticipated competencies of employees in accordance with the strategic needs of the Bank. In the field of employee development, the Bank promotes the so-called Blended learning approach, i.e. a combination of different learning modalities according to the following principle: approximately 70% of learning is realized through work, 20% through mentoring of colleagues and 10% through formal learning and training.

*

The role of managers is to define training needs in agreement with their employees, keeping in mind the objective needs of the job, and to provide them with support and favorable opportunities for continuous personal and professional growth.

In order to enable employees to acquire additional skills and broaden their accountability, the Bank also promotes work in cross functional teams, extension of responsibility and broadening the job scope through collaboration on various internal projects.

Talent and performance management

The Bank promotes a workplace where everyone understands the importance of his/her work in achieving common goals.

The line managers are encouraged to maintain continuous performance dialogue throughout the year with their employees.

The Bank ensures that the formal review process is conducted. This enables managers to acknowledge high performance of the employees and to award them accordingly. On the other hand it also ensures that the low performance is managed timely and properly.

The promotion and succession planning is based on the sustained performance (WHAT/RESULT and HOW/BEHAVIOR) and assessed future potential of an employee.

Rewards System

Depending on the positions, the Bank's rewards system consists of competitive remuneration package, variable pay and benefits, in accordance with Labor Law, Human Resources Policy Manual and Labor Agreement.

Work Environment and Conditions

The Bank is committed to providing to its employees a good working conditions and safe and healthy work environment. The Bank ensures security and safety at work in accordance with relevant legal requirements and Bank Human Resource Policy Manual.

Employee Relations

The Bank has built a culture based on trust, mutual respect and dialog and does not tolerate any form of harassment and discrimination.

The Bank strongly promotes transparency in communication, so that employees are encouraged to point out the situation if they believe that any aspect of the employment relationship has been violated.

*

Continuous retention rate monitoring and conducting surveys on employee satisfaction with the work environment

With the aim of tracking and timely response to possible problems from the perspective of employees, the Bank monitors the retention rate of employees and measures employee satisfaction with the work environment.

Respect for human rights

The Bank respects all human rights guaranteed by the Constitution of the Republic of Serbia.

Principles of Human Resources

Human resources management represents a shared responsibility of the management and human

Resources Department, which is guided by the following principles in its daily work:

1. Employees are the Bank's most important resource i.e. potential
2. All employees shall follow to the Mission and Values of the Bank
3. The Bank ensures impartial employment process
4. The Bank does not employ persons under 18 years of age, thus ensuring compliance with the Labor Law and Human Resources Policy Manual.
5. The Bank takes care of career development of its employees
6. The Bank provides adequate training to all employees
7. Employee performance is assessed by the annual appraisal form that measures work performance and employees' respect for the Mission and Core Values of the Bank
8. All employees are entitled to advancement in accordance with results achieved and their potential
9. The Bank targets the median salary level compared with banking peer group in Serbia.
10. The Bank provides adequate working conditions for employees in accordance with the Law and best practices
11. The Bank monitors, investigates and documents all injuries incurred in the course of regular business activities
12. Rights, duties and responsibilities of the employees and the Bank as an employer are more closely defined in the HR Policy Manual.

Principles of compensation system

There are 6 basic principles in Bank's Salaries structure:

Fairness - Principle that is fair to both the individual and the Bank.

Internal Justice - A fairness criterion that directs an employer to establish salary logic that correspond to each job's relative value to the organization.

*

Competitiveness - Specific to a particular job and the conditions at the banking labor market for the skills needed. Pay ranges that are comparable to those offered by local and regional employers for similar positions. Also, the principle takes into account the criticality as well as the deficit of a specific position in the labor market.

Performance based - Individual performance, organizational performance, and the needs of the Bank are considered when determining salary.

Transparency - A commitment by the Bank to be transparent and inform all employees about any changes in the compensation system.

Living wage concept – Bank aspires for the continues prosperity of its employees and aims to provide the living wage that will cover basic living needs by paying attention to living standards in cities and purchasing power index.

The Bank shows interest in a market compensation survey on an annual basis, which provides market data across a selected peer group within Serbia, covering cash compensation and non-cash compensation comparison.

Banking operations results

Lending to farmers

Since its establishment in Serbia in 2002, 3 Bank strongly supports the development and operations of registered agricultural holdings, regardless of whether they are commercial or non-commercial.

From the very beginning of its operations in Serbia, a very important target group for 3 Bank are clients who live and work in rural areas, are engaged in agricultural production, and this is their only or additional source of income.

The goal of 3 Bank is to support the development of rural areas and local communities, thereby implementing our mission, which is self-employment - opening new jobs, creating opportunities for starting your own micro and small production, or increasing and modernizing intensive agricultural production.

In 2022, 25% more loans were disbursed in volume and 3% in number than in the previous year, while at the same time the loan portfolio increased by 17% compared to 2021.

Lending to entrepreneurs and small businesses

Business loans approved by 3 Bank are intended for all registered entrepreneurs and private companies in Serbia.

Loans are granted for business activities from the production, services and trade sectors, and our goal is to stimulate the development of entrepreneurship and thus contribute to creating new jobs and reducing unemployment.

*

At 3 Bank, loan support to the business sector is complete, from empowering small business ideas for beginners, through providing support and improvements to entrepreneurial ventures, regardless of the size of the project or the size of the company, to the care of the small and large needs of the business sector for overcome numerous current or investment problems.

In 2022, 29% more loans were realized than during the previous year, while the loan portfolio grew by 35% compared to 2021, with a keeping the high quality of the portfolio.

Lending to pensioners and employees

As during previous years, the Bank has focused its attention on creating specific retail products and services in order to reach even more clients with difficulties accessing financial services, especially those in rural areas of Serbia and with low incomes as a target group of the 3 Bank.

Loans for pensioners and employees allow a wide range of people with limited excess to financing to use our products and thus improve the standard of living of their households and family members.

In 2022, 52% more loans in number were disbursed than in the previous year, leading to the loan portfolio growth of 15% compared to 2021.

The business model

The Bank specializes in providing loans and other financial services to entrepreneurs, micro and small businesses, rural and agricultural households in the Republic of Serbia, as well as to other clients who has limited access to financial services. In addition, the Bank provides access to financing to employed persons, regardless of the type of employment contract, and has additionally enabled the realization of loans for those persons via digital platform.

The Bank's activities are aimed at increasing the number of clients through financial inclusion, improving the quality of products and services, as well as negotiating an innovative business model in order to ensure the Bank's successful results expressed in financial indicators and qualitative risk management.

The Bank provides clients with financial products tailored to their specific needs with the best possible quality of services and continuous contribution to the development and economic prosperity of the community, and in proportionally to the results achieved, the living standards of our employees grow as well.

The bank collects funds through deposit products of an educational nature, fostering the principle of the importance of small depositors through a price policy.

An adequate relationship with investors enables the Bank to ensure further strengthening of capital in the medium term (through capitalization or taking subordinated loans) and other sources of financing, primarily from the Bank's shareholders and international financial institutions.

*

Sustainability approach

The Mission of 3Bank is to provide financial services to all those who make a positive economic, social and environmental impact, with special focus on clients who have difficulty in accessing such services.

The concept of sustainable banking is based on the principle of achieving growth and profit but in line with the achievement of social and environmental goals. We have included these principles in our strategic goals. Our goal is not just making profit, in addition to that we also want to make a positive impact on people, the community and the environment. 3 Bank implements its activities in a way that keeps all three goals in balance and the achievement of one goal must not jeopardize the other two.

3Bank is a member of the Global Alliance for Banking on Values (GABV <http://www.gabv.org/>). Over sixty GABV members from around the world work with a common goal: achieving sustainable economic and social development, with special emphasis on preserving the environment and supporting individuals to realize their potential, thus strengthening the communities in which they live and work.

Our core values are:

People first

We strive to encourage positive changes in the lives of our employees, clients and the community itself.

Sustainability

We are focused on social and environmental impact, as well as our bank' s sustainability which is reflected in everything we do.

Transparency

Being direct and honest is an integral part of our culture. This is how we build trust.

Inclusiveness

Equal rights to financial services for all. We pay special attention to those who have difficulties in accessing banking services.

Innovation

We are constantly striving to improve ways in which we operate and service our clients.

*

Community impact

During 2022, the bank continued to conduct online educational activities for its clients and all citizens of the Republic of Serbia.

Agro EaSI education - Blog for farmers

During 2021, 3 Bank launched a blog that provides educational content for farmers. The content is completely free and introduces farmers to a full range of topics that contribute to the successful management of their households and the improvement of household related activities.

Education on sustainable development

During 2022, through official profiles on social media and articles on the its website, the bank began to educate citizens about the importance of environmental protection and the ways in which we as individuals can contribute to it. Through educational articles, photographs, infographics, sharing related news, we try to make the topic of sustainable development as relevant as possible for each individual and contribute to raising awareness of the goals of sustainable development.

Sustainable Development Goals (SDG) Management

The Sustainable Development Goals are a universal call to action to eradicate poverty, protect the environment and ensure peace and prosperity for all as part of a new UN global plan for sustainable development.

To support the achievement of sustainable development goals, 3 Bank focuses its activities and impact on the following five Sustainable Development Goals:

1. No poverty

First UN Sustainability goal is to end poverty in all its forms everywhere. In line with this goal, the bank provides support to rural clients, clients with difficult access to banking services and low-income clients.

AIM	SDG - KPI's	Unit	Jan-December 2022
	Loans to rural clients*	%	75 %
	Loans to underbanked clients**	%	40%
	Loans to low income clients***	%	35%

In accordance with the introduction of new products, intended for new segments of clients with limited access to financial services, 3Bank has defined new KPIs for 2023. The goal is that 65% of the portfolio consists of clients living in rural areas, and 35% clients with difficult access to financial resources.

*

*Credit clients of 3 Bank are categorized as "rural" if they have an address outside the cities (the definition of the city is in line with the Law on Territorial Organization of the Republic of Serbia).

**The share of these so-called "Underbanked" clients in monthly loan payments are measured as the percentage of credit clients who do not have previous loans recorded in the Credit Bureau. This share is measured only for clients who take their first loan in 3 Bank.

***The Bank applies an internal methodology for measuring the share of clients with lower than average incomes in the Republic of Serbia, which is in line with the Household Budget Survey conducted quarterly by the Statistical Office of the Republic of Serbia.

2. No poverty

The zero hunger goal aims to end world hunger, achieve food security and improved nutrition and promote sustainable agriculture. In line with this goal, the Bank finances agricultural households and agricultural production, thus helping to diversify the food market and food availability.

AIM	SDG - KPI's	Unit	Jan-December 2022
	Loans to agro clients	%	39%

3. Decent work and economic growth

This goal aims to promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all. The Bank finances start-up entrepreneurs, micro SMEs and agricultural households, which together with regular loans also leads to the growth of clients.

AIM	SDG - KPI's	Unit	Jan-December 2022
	Loans to business clients	%	38%
	New jobs created	%	6,161

4. Responsible consumption and production

The goal of responsible consumption and production aims to ensure sustainable patterns of consumption and production. The Bank has adopted the principles of reducing the overall internal impact on the environment, reducing energy consumption (and the use of green electricity), paper, waste and reducing the CO2 footprint.

*

AIM	SDG - KPI's	Unit	Jan-December 2022
	Climate impact intensity	tCO2/ FTE	2.55

5. Climate action

The climate action goal aims on take urgent action to combat climate change and its impacts. The Bank integrates environmental issues with social, cultural and economic aspects. In the lending process, we take into account aspects of environmental protection. The Bank uses a list of exclusions, measures the impact of the portfolio according to the PCAF standard as well as GABV scores and reports in accordance with GRI principles. The bank is one of the signatories of the GABV 3C Carbon initiative.

During 2022, 3 Bank issued their new PCAF report. Regular reporting of SDG goals is done on a monthly basis for the bank's management and on a quarterly basis for the bank's Board of Directors.

Investments in environmental protection

To support the achievement of sustainable development goals, 3Bank focuses its activities and impact on the following five Sustainable Development Goals: No poverty, Zero Hunger, Decent work and economic growth, Responsible consumption and production, Climate action.

In accordance with the principle of materiality, and taking into account business goals, broader economic and social context sustainability, as well as the results of conducted research on attitudes stakeholders, 3Bank has identified the following topics as material:

1. Economic performance
2. Anti – corruption
3. Energy
4. Water
5. Emissions
6. Waste
7. Non-discrimination

Through its Sustainable Development Goals Policy, the Bank seeks to ensure that its business activities encourage sustainable development, taking care of the environment. The Bank seeks to ensure that the business projects it finances do not have negative environmental impacts, i.e., that they are designed to be conducted with the control of their environmental impact and in accordance with the applicable statutory framework of the Republic of Serbia. In addition, the term "environment" is used in the broadest sense which includes not only environmental aspects but also the protection of employees and issues related to local communities, i.e., social issues. Bank have methodology for measuring impact of direct and indirect emissions in line with PCAF methodology. Bank recognized as direct emissions fuel consumption and indirect emissions heat, electricity, paper consumption

*

In order to protect the environment, the Bank is working on the development of products and services that will meet environmental goals, as well as those related to social impact and prosperity through:

- further increase of employee awareness about environmental risks in the lending process;
- improving reporting and measurements in relation to the Bank's impact on the environment;
- Implementing positive measures to reduce CO2 emissions, conserve energy, reduce material consumption such as paper and recycle waste.

Within its own activities and business processes, the Bank constantly strives to reduce the negative environmental impacts of its activities, such as:

- care about the occupational health and safety of its employees,
- publication of information and data on environmental impact, on the Bank's website and internal magazine in order to increase employee awareness of the environmental impact,
- reporting on the environmental impact of the loan portfolio in accordance with PCAF standards,
- improving the Bank's energy efficiency class during the design and adaptation of business premises through the use of new materials and a movement towards the use of renewable energy sources,
- enabling the classification of waste within all business premises it uses.

The Bank is dedicated to monitoring the impact that Bank and loan users have on the environment, as well as facilitating dialog with stakeholders.

Energy consumption

Rational consumption of non-renewable energy sources is an integral part of the strategy of 3Bank.

1. During the Rebranding project, illuminated advertising boxes in all 3Bank branches were replaced with new, LED boxes, significantly reducing electricity consumption.
2. The Bank has procured the energy from the Renewable sources from the power supply provider. The green energy provided from EPS is entirely originating from hydro electric power (solar and wind part is insignificant). We have a contract with Elektroprivreda Srbije for using 100% renewable energy in all our branches.

		2022.
	Heat	997.93 GJ ¹
	Electricity	1884.23 GJ

¹ <https://hextobinary.com/unit/energy/from/gasoline/to/gigajoule>

Transport

Considering that one of the strategic goals of the bank is operating in rural areas, direct access to clients has great importance to us. Emissions that occur as a result of transport represent a material aspect, so this topic is among the bank's priorities. Fuel consumption is monitored, including business trips, as well as employee transportation during the acquisition of clients. Our employees that operate with client acquisition uses their own cars, and all of the expenses are covered in accordance with HR policy. The significance of the impact is determined on the basis of CO₂e emissions from annual mileage in relation to FTE.

2022.	
tCO₂e fuel (Diesel and Petrol) Scope 1	121,39

Paper consumption

The Bank launched a project aimed to optimize the process in a way that contributes to reducing the volume of printing. In 2022, the volume of printing in 3Bank decreased by 12%. Along with the optimization of the process, the education of employees using internal communication tools was launched, in order to improve their knowledge about document management, without unnecessary printing.

2022.	
Paper consumption	0.074 GJ

Bank has adopted principles of reduction of internal impact on the environment, reduction of energy consumption (and using green electric energy), paper, waste and reduction of CO₂ footprint. Bank will make a meaningful difference through reduction of the climate impact of our operations intensity measured in tCO₂e per year/FTE.

CO₂ emmissions

2022.	
Scope 2 emissions (tCO₂e)	1401,73
GHG emissions intensity per FTE (tCO₂e per FTE)	2,55

*

Waste

Disposal methods are determined in accordance with the Law on Waste Management and bylaws in this area (Regulations, regulations), the 3 Bank's Waste Management Plan, which accompanies the document on the movement of waste depending on its category (hazardous / non-hazardous). At the beginning of each year, and no later than March 31, the annual report on the waste of the waste producer for the previous calendar year is submitted on the GIO1 form. Form GIO 1 is filled in through the information system - NRIZ and additionally submitted to the Agency on the forms that are printed from the information system NRIZ.

In 2022 year 3Bank had 2035 kg of hazardous waste which was submitted for recycling and destruction, with full implementation of the Law on Waste Management. There was 2.485 t of discarded electrical and electronic equipment that was submitted for recycling.

Also 3Bank supports civic initiative CAP FOR HANDICAP, which promotes better and improved quality of life for people with disabilities. This action, well-known throughout Serbia, implies collection of plastic caps and lids which are later recycled in order to provide the necessary equipment and orthopedic aids for people with disabilities, thus preserving the environment at the same time. In 2022 3Bank collected 150kg of bottle caps for this initiative.

Water

Bank has no specific standards set for the quality of effluent discharge. Bank uses local municipality effluent receiving network. Organization produces common water discharge from water sinks, kitchens and toilets. Total fresh water withdrawal from all areas is 3560,2 megaliters per year 100% from third-party water. The data have been compiled based on the municipal utility service invoices for 2022.

Anti-corruption and bribery

The Bank has zero tolerance towards all actions that are illegal, including actions related to corruption and bribery. The bank does not tolerate any type of bribery and corruption, does not allow any type of benefit, regardless of whether the person who offers or requires works in the public or private sector.

The ways in which the Bank opposes corruption and bribery are defined in the internal act, the Compliance Policy. The fact that this matter is regulated by an internal document – which type is policy and which is adopted by the Executive and Board of Directors, speaks of the importance the Bank attaches to anti-corruption, that is, to the prevention of behavior that can lead to corruption.

The Compliance policy establishes the compliance standards, especially the Bank basic values and principles, the code of ethics and professional banking practice and corruption prevention. The policy defines the term of bribery and the principles for preventing bribery. Corruption is defined by the Compliance Policy as abuse of authority given to a person, with aim is achieving personal benefit. Bribery is defined by the Compliance Policy as a direct or indirect promise or giving someone a certain advantage, with aim is performing or not performing tasks or jobs that are part of regular duties.

In order to opposes corruption and bribery, the Bank has defined in Compliance Policy forms which can potentially lead to corruption or bribery (giving and accepting gifts and invitations, dealing with persons acting on behalf of the Bank (third persons), making facilitation payments, sponsorships and donations, conflict of interests) and for the same established the principles which has to be followed in order to protect the Bank from corruption and bribery, in this sense:

*

Gifts represent a type of benefit, whatever the monetary value, given to a person or legal entity that are granted mostly for reasons of gratitude or for enhancing one's image, without expecting any specific return service. Employees of the Bank may give or receive gifts and invitations from clients or third persons only if the gift meets the conditions which are strictly prescribed by the Compliance Policy.

Dealings with third persons refers to dealing with all persons who directly or indirectly perform specific services in the name or on behalf of the Bank, as is the case with advisors, intermediaries, consultants, service providers, etc. For the purposes of effectively preventing corruption and possible financial damage and damage to Bank reputation, special precautions must be taken when commissioning such third persons as they can be made use of – with or without the knowledge of the Bank's management -for indirectly paying bribes. The Compliance policy prescribes in detail special measures that must be applied in business with third parties.

Sponsorship means supporting a person, group or organization by financial means, contributions or services. In return, the public through the activities of the recipient of the sponsorship, increase the recognition of the sponsor in the public's awareness of the sponsor is increased through the activity or sponsored party and the brand or the name of the sponsor is given a positive connotation. In contrast to donations, sponsorship has a commercial orientation and provides a business advantage to both parties. Donations are given for the good of the community, often within the scope of a company's corporate social responsibility activities and without the expectation of any specific service in return. The Compliance policy prescribes special conditions that must be met in order for the Bank to be a sponsor, or to donate.

A conflict of interest arises when individuals have personal interest that may interfere with, or appear to interfere with, the independent exercises of judgment in business dealings. Employees must avoid situations in which decisions made on behalf of the Bank would be influenced by personal interests, which is why existing, potential and perceived conflicts of interest require careful management. The Compliance policy distinguishes between two types of conflicts of interest that may indicate potential corruption: internal

Compliance Policy approved by the Board of Director describes the following compliance standards: Mutual respect and Non-Discriminatory Policy; Zero tolerance for any form of bribery and corruptions; All employees shall avoid conflict of interest; Equitable and fair treatment of customers; Responsible business conduct etc... Compliance Policy also contains Bank's core values: People first; Sustainability; Transparency; Inclusiveness; Innovation.

Additionally, in accordance with the Labor Rulebook approved by Executive Board all employees shall acting professionally toward clients and colleagues and should never abuse their position in Bank. Compliance Department performs regular annual trainings for all Bank's employees including the Executive Board members, regarding the compliance topics and standards. All employee shall sign the appendix 2 to the Labor Agreement "Code of conduct and confidentiality of information". All 3Bank partners in accordance with their agreements concluded with Bank are obliged to apply compliance standards. In accordance with the Compliance Policy, ultimate responsibility for the application of the Bank Code of Ethics lies with the Executive Board. Compliance Policy is available in Serbian and English language. Labor Rulebook is available only in Serbian language.

The Compliance policy additionally elaborates potential situations that can lead to corruption or bribery.

*

The Bank has a number of mechanisms that raise employee's awareness that corruption and bribery are strictly prohibited and if it is committed, it can lead to a series of consequences for the employee, both in accordance with positive legal regulations and in accordance with the Labor Regulations. Every employee, regardless of the type of work engagement when establishing an employment relationship, is introduced to anti-corruption through a provision in the contractual documentation. Furthermore, once a year, every employee attends training in the area of compliance, the integral part of which is a topic in the area of anti-corruption in which employees are taught about zero tolerance, risks, ways of recognition, ways of reporting cases related to corruption or bribery, relevant internal acts with which employees are in obligations to meet and contact persons regarding any issue related to corruption and bribery. In addition to the above, all employees have access to the Compliance Policy.

Research and development activities

In 2022, after the Rebranding project was completed, a public opinion survey was conducted on the Brand Awareness. Half a year after the new name and visual identity were launched, a research showed that the recognition of the 3 Banka brand was measured at the level of 11% when it comes to the general population.

The Bank continued to develop products and services based on customer needs, as well as on realization of social, ecological and development goals. Most of the activities during the previous year were focused on:

Development of products and services tailored to customer needs

During 2022, the Bank worked on the development of credit products intended for small farmers and entrepreneurs in order to ensure access to financial services in the initial stages of their business development (start-up). In addition, research has shown that one of the key obstacles in the further development of this segment is the absence of long-term financing, therefore the Bank adjusted its products and facilitated access to long-term investment loans and thus provided support for the further growth and development of their businesses.

A significant part of the activities in 2022 was focused on the research and development of loan products from the "green agenda", which should support the Bank's efforts to, with the strong support of shareholders, actively contribute to the environment protection and to become one of the leaders in lending in this segment in the future.

Expanding the business network

In 2022, the trend of opening new credit offices continued, primarily in rural areas, in order to make products and services available to as many customers as possible.

Development of digital channels and processes

In 2022, the Bank continued with investments in the digitization of its activities. The first digital product that allows clients to quickly and easily realize a loan without coming to the bank was introduced, which further contributes to easier access to financial services, especially for client

*

segments to whom the said access is limited. Also, a base was created for the further development of the Bank's products and services in the digital sphere.

Future development of the Bank

An accent in the coming years will be placed on:

- Continuation of sustainable growth in business, agriculture and population with increased market share in clearly defined segments;
- Continuation of digitalization of business activities with a focus on digital products and services aimed at customers;
- Increasing operational efficiency, improving the process and speed of service, in order to efficiently manage a large number of clients who do not have easy access to financial services;
- Increased activities to diversify sources of funding as a prerequisite for ensuring long-term stable growth;
- The development of innovative savings products that will enable savings to client, with smaller cash amounts, both in the RSD and the EUR.
